

**Crime Fundamentals 3** is the third part of the Crime Fundamentals series by whatabaudio - and the first one made exclusively for u-he's Zebra HZ / Dark Zebra. It offers 200 cinematic presets, full of character and ready for production.

**Crime Fundamentals 3** shifts the focus towards the low end and suspenseful sound design. You'll find a huge range of basses - from deep sub drones to punchy, driving pulses - and a large palette of sound effects. These aren't your typical

trailer risers: small flickering gestures, eerie atmospheres or quirky bells set an uneasy mood without fighting the dialogue.

The extended engine of Zebra HZ / Dark Zebra - the heavily used resonator module in particular - gives **Crime Fundamentals 3** a rawer, darker sound that blends perfectly with picture.

### **Designed with purpose.**

Very often, the crime drama genre does not ask for the big guns but for clear and simple sounds that still feel a bit off. These aren't patches made in a vacuum: they're battle-tested and pulled from real scoring sessions, including Germany's biggest crime-drama show, SOKO Leipzig. If it doesn't work to picture, it's not in there...

Like its predecessors, **Crime Fundamentals 3** gives you a complementary set of tools to cover every aspect of a story. Characterful leads, keys, drums and hits stand next to atmospheric pads and - of course - a vast collection of driving tonal pulses and woody, organic tickies.

### **Simplicity is key**

I am a big believer in simplicity: The patches are easy to use and are designed to sound like a film score and sit in the mix and around the dialogue right out of the box. Every sound was made with a certain purpose in mind and you can only tweak them within a range that serves a scene or emotion best (IMHO). They make no use of Zebra's X/Y-Pads to go berserk and break a scene - instead everything you need is in the Mod-Wheel. The sounds will always keep their cinematic and emotional character. In the description of each patch you will find a suggestion of how to use the patch the best way, what

to play and what's the best tempo and key range. If you find an entry like:

Best Keyrange: C1 - C2

C1 refers to midi note number 36, C2 refers to midi note number 48, etc.

I hope you enjoy **Crime Fundamentals 3** as much as I did making these sounds and write great music with it. Let me know!

-Andreas

### **The Patches:**

**Crime Fundamentals 3** contains a total of 200 Patches:

42 BASSes

5 DRONES

5 DRUMs

11 HITs

10 KEYs

17 LEADs

3 LOOPs

9 PADs

24 PULSEs

6 SEQuences

36 SFXs

2 SYNTHs

30 TICKYs

## Installation:

**Important Note:** This soundsset works within u-he's Zebra HZ / Dark Zebra software synthesizer (the sounds will **not** sound as intended in Zebra 2 !!!). The soundsset can not be used in any other software synthesizer or plugin and does **not contain** any samples.

Zebra HZ / Dark Zebra is **not** a part of this package - a valid license must be purchased here: <https://u-he.com/products/zebra-legacy/>

The patches have been created with Zebra HZ version 2.9.4 (REV.16765), make sure you have this or a later version installed.

Installing the soundsset is pretty straightforward:

Unzip the „WhatabaudioCrimeFundamentals3.zip“. Then locate your u-he preset folder and place a copy of the folder with the patches (the folder's name is: „whatabaudio - Crime Fundamentals 3“) there:

If you're on Windows locate your „ZebraHZ.data" folder here:  
C:\Users\\*YOUR USERNAME\*\Documents\u-he\ZebraHZ.data\  
Then go to ...\\Presets\\ZebraHZ\\

If you're on a Mac go here:  
.../Users/\*YOUR USERNAME\*/Library/Audio/Presets/u-he/  
ZebraHZ

## **The easy way**

If your u-he presets are located somewhere else, you can easily find them from within the Zebra HZ plugin: Open the preset browser and load a factory preset. Use a right click on the preset name and choose Open in Explorer (Windows) or Reveal in Finder (macOS). You will now be directed to the correct installation path. It is important to place new presets there so that Zebra HZ can find and show them in the preset browser. Refresh the preset browser and you're ready to go!
